Advanced Training Programme on

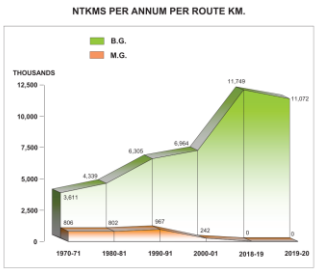

“Transport Economics”

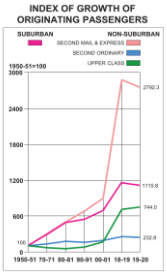

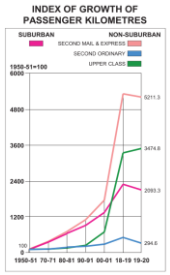

Program Overview : Transport Economics, being the study of allocation of resources in order to produce and distribute various transport services for use of society, is an important subject for all railway officers. Transport Economics focuses on efficient transport operations with less expenditure and optimum use of scarce or limited resources.

Program Coverage : Program will cover topics like Introduction to and Essentials of Transport Economics, Costing and Rating of Passenger and Freight services, Marketing of Freight & Passenger Services, Logistics & Supply Chain Management, Case studies on Transport Economics, Productivity and Performance indicators, Planning Railway services, Allocation of Resources, Various modes of Financing including Extra-budgetary resources, Challenges and Innovations in making Transport services viable and profit making, Transport & Public Policy, etc.
